Cumulative performance since inception (%)

Fund analysis

	Fund
Average Coupon	5.2
Average Life	6.6
Yield to Worst	5.1
Yield to Maturity	5.1

Any yields quoted on the fact sheet are calculated at portfolio level gross of tax and expenses.

- Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue.
- Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund.
