Characteristics source: Principal Global Investors and/or its affiliates and the Index. Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund. Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue.

Fund overview

The Fund seeks to maximize total return over the medium to long term through a combination of capital growth and income. The Fund seeks to achieve its objective by investing primarily in a diversified portfolio of Shariah-compliant fixed income securities (Sukuk) issued by government, government-related entities such as their local authorities and public authorities, corporate or supranational entities located globally.

Organisation

Principal Islamic acts as a global partner to institutional global investors, providing a range of innovative Shariah-compliant solutions to help diversify investment portfolios and achieve financial goals. We offer customised mandate for institutional investors and Undertaking for Collective Investment Trust (UCITS) via the Principal Global Investors Funds platform. Principal Islamic is a joint venture between Principal Financial Group and CIMB Group, and headquartered in Kuala Lumpur, Malaysia. This allows Principal Islamic to leverage on Malaysia's comprehensive Islamic financial infrastructure and its adopted global regulatory, legal and Shariah best practices, whilst Principal Global Investors (the asset management arm of Principal Financial Group) lends its expertise in global asset management.

Risk warnings

- Sukuk Investment Risk – Like for other fixed income securities, price changes in Sukuk are influenced predominantly by interest rate developments in the capital markets, which in turn are influenced by macro-economic factors.
- There is no guarantee that the investment objective of the Fund will be achieved.
- The potential for profit is accompanied by the possibility of loss.
- There are specific risks associated with the use of derivative instruments, including counterparty, position, liquidity, settlement, correlation and legal risk.
- Contingent convertible securities risk is due by the substantially greater risk that these instruments may have compared to other forms of securities in times of credit stress and may result in a material loss to the Fund.
- Mortgage and Asset-Backed Securities carry greater risk compared to other securities in times of market stress such as early payment and/or extension of the life of the underlying assets.
- Liquidity risk: The risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets
- The value of an investment may fluctuate due to changes in exchange rates between currencies and may or may not be hedged back to the Fund's base currency.

Performance note

This document presents the performance of this particular unit class of the Fund from the date of inception of the unit class in its unit class currency, as specified on the front page, unless otherwise specified below.

The performance data shown is based upon the Fund's Net Asset Value (NAV) prices of the last Irish business day of the month. For Funds not open for dealing on this day this will be an indicative NAV. As a result, it is possible that the stated performance and the actual investment returns available to investors will differ. The performance data shown is net of fees and other charges but excludes any potential entry/exit charges – as such the returns an investor receives may be lower.

The fund originally launched 09/07/2016 and was previously named Principal Islamic Asset Management – Global Sukuk Fund and merged into Principal Global Investors Funds – Global Sukuk Fund on 10/05/2024. Performance reflected up to 10/05/2024 was achieved under the merged fund.

Index Disclosure: The Fund is actively managed and aims to outperform the Dow Jones Sukuk Price Return Index* (the "Index"). The portfolio manager may reference the Index as part of the investment management process and the majority of the Fund's investments will be in securities that are components of the Index. However, the portfolio manager maintains full discretion to select investments for the Fund in line with the above investment policy and with prior approval from the Shariah Adviser. This document presents the performance of this particular unit class of the Fund from the date of inception of the unit class in its unit class currency, as specified on the front page. Prior to 31st December 2018, the data performance calculations reflect the month end market close prices of the Fund's assets. After 1 January 2019, the performance data shown is based upon the Fund's Net Asset Value (NAV) prices of the last Irish business day of the month. For Funds not open for dealing on this day this will be an indicative NAV. As a result, it is possible that the stated performance and the actual investment returns available to investors will differ. Outperforming the Dow Jones Sukuk Price Return Index is not specifically included in the objective for the Fund, and the figures shown in the table are provided as a comparison only. Past performance is not indicative of future performance. All figures are stated in USD unless otherwise noted. Investments do not always add up to 100% due to rounding

Important information

Global Sukuk Fund

- The interest rate used is a general economic indicator that will have an impact on the management of the Fund regardless whether it is a Shariah-compliant Fund or otherwise. It does not in any way suggest that the Fund will invest in conventional financial instruments. All the investments carried out for the Fund are in accordance with Shariah requirements.
- Unless specified in this document, the strategy does not: (i) promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of the Sustainable Finance Disclosure Regulation (EU) No. 2019/2088 ("SFDR"); nor (ii) have sustainable investment as its objective in a way that meets the specific criteria contained in Article 9 of SFDR. Notwithstanding this, the strategy/product is managed in line with the Principal Global Investors responsible investment policy, incorporating its Sustainability Risk and Principal Adverse Impacts policies. These policies can be found at <https://www.principalam.com/eu/investment-products/ucits-funds>.

Global Sukuk Fund

Definitions

1. Alpha (%)- The difference between an investment's actual returns and its expected performance, given its level of risk (as measured by beta).

2. Average coupon- Average coupon is the average rate of the coupons of the bonds in a fund, weighted based each bond holding's size relative to the portfolio.

3. Average life- Weighted Average Life (WAL) is a metric used to determine the average time it takes for the principal of an investment to be repaid.

4. Beta- An investment's sensitivity to market movements.

5. Information ratio- A risk-adjusted measure commonly used to evaluate an active manager's involvement skill. It's defined as the manager's excess return divided by the variability or standard deviation of the excess return.

6. Management fee(s)- A management fee is the cost of having your assets professionally handled. The fee compensates professional money managers as they select securities for a fund's portfolio and manage it based on the fund's investment objective.

7. Standard deviation- Measures how much an investment's returns are likely to fluctuate.

8. TER (%)- The total expense ratio (TER) covers the annual costs of running a fund based on all the known expenses associated with the fund's operation.

9. Tracking error (%)- The standard deviation or volatility of excess returns.

10. Yield to maturity- The yield to maturity (YTM) is the annualized return on a debt instrument based on the total payments received from the date of initial purchase until the maturation date.

11. Yield to worst- Yield to worst is a measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.
