Risk warnings

- The Fund may utilise a number of derivative instruments in managing the Investment Objective of the Fund. The primary risks associated with the use of such instruments are credit risk, counterparty risk and collateral risk.
- There are specific risks associated with investments in emerging markets, resulting from potentially less developed market practices. These include legal, political and fiscal instability, settlement, liquidity, currency, accounting standards and custodial risk.
- Due to underlying real estate assets held in REITs, the liquidity of these securities is typically less than other equity securities.
- The market value of Sukuk is affected by changes in prevailing interest rates. The Fund may also be exposed to credit and default risk by investing in such securities. Additionally due to its size, The Sukuk market may present liquidity risk.
- There is a higher default risk associated with investment in below investment grade Sukuk.
- The value of an investment may fluctuate due to changes in exchange rates between currencies and may or may not be hedged back to the Fund's base currency.
- The price of equity securities fluctuates based on changes in a company's financial condition, overall market and economic conditions and market sentiment, resulting in an increased potential for volatility.
